PROFESSIONAL SUMMARY

Bioinformatics student and computer science graduate with experience in AI data evaluation, machine learning, and data pipeline development. Proficient in Python, SQL, and data analysis, with a strong interest in data-intensive and interdisciplinary research.

EDUCATION

Northeastern University, M.S. in Bioinformatics

Start: Fall 2026

St. Petersburg College, B.S. in Software Engineering, GPA: 3.7 / 4.0

Aug 2022 - May 2026

TECHNICAL SKILLS

Programming: Python, SQL, R, Java, C++, JavaScript, HTML, CSS

Data & Machine Learning: Data Analysis, Machine Learning, Model Evaluation, RLHF, Data Labeling, Classification Models

Databases: MySQL, MongoDB

Frameworks & Tools: Flask, Node.js, Spring, Flutter, Node-RED

Other: Data Pipelines, Web Scraping, Cloud Computing, Quality Assurance

WORK EXPERIENCES

Healthcare Data Analyst Extern, TruBridge

Remote, FL

Extern

Feb 2026 - Present

- Conducted exploratory data analysis on publicly available healthcare datasets, examining infection trends through variables like case counts, demographics, and time patterns to uncover meaningful insights.
- Leveraged structured research and analytical tools to guide data discovery, generate research prompts, and support the creation of visualizations, dashboards, and reports on infection-related public health trends.
- Produced synthesis reports and presentations covering key areas including infection trends, data limitations, population insights, public health implications, and recommendations for stakeholder action.

Software Developer Intern

Remote, FL

Jetzy

Aug 2022 – May 2023

- Spearheaded the development of an HTML-based visualization platform; revolutionizing the way the company analyzed user behavior within their app
- Leveraged expertise in Python Flask to extract and process user data from the SQL server, enabling more efficient and data-driven decision-making for the organization
- Innovatively employed a machine learning-based classification model to categorize a vast array of online articles into distinct categories, facilitating the enhancement of content recommendations and user experiences
- Pioneered a web scraping methodology to gather and classify articles based on keywords, streamlining the content categorization process and increasing the app's engagement metrics.
- Conducted impactful data mining activities across social media channels, amassing valuable insights into the organization's performance and activities

PROJECTS

Data Collection System for The Leo Project | Node-RED, MySQL

Jan 2024

- Enabled the Leo Project to monitor water distribution effectively, contributing to its mission of addressing critical challenges in Laikipia, Kenya
- Simulated data flow using Node-RED, simulating metrics like water level and pH value, and configuring data storage in MySQL for real-time data collection
- Developed a user-centric, real-time dashboard reflecting data from the database, with the option to include additional features and analytics

ORGANIZATIONS

Stanford Data Ocean Bioinformatics Bootcamp (via Conectado)

Member

Dec 2023 – Jan 2024

- Completed career readiness program in collaboration with Stanford Data Ocean Bioinformatics Bootcamp
- Earned a certificate in Fundamentals of Data Science in Precision Medicine and Cloud Computing

Rewriting the Code

Member

May 2022 – Present

- Engaged in mentorship and networking opportunities with women in technology, strengthening professional development and career readiness
- Participated in technical workshops and career panels focused on coding, leadership, and industry best practices
